

AIAM MEMBER HIGHLIGHT

L'Anse Manufacturing, Inc. | L'Anse, Michigan
Mark Massicotte, President

www.lansemfg.com

L'Anse Manufacturing was established over 30 years ago primarily serving the investment casting industry with strightening and machinging services.

A little over 13 years ago the company was acquired by the current management team and the company has since developed a quality systems approach for precision machining.

L'Anse Manufacturing serves multiple markets from aerospace and medical to OEM, defense,

and special products. They are able to process a wide assortment of materials from polymer based, light weight, and high strength components with our low-volume high-mix approach for machine utilization.

They still serve the investment casting industry today with CNC milling and turning for precision machining services. This allows them to provide valuable service for Defense, Aerospace, Medical, OEM, and Special Project applications.

TOTAL NUMBER OF EMPLOYEES

20

All 20 employees are engaged in aerospace activity.

GREATEST ACCOMPLISHMENT

"Development of our workforce and diversification of our customer base. Both have brought rewards that produce a good foundation for future growth."

GOALS AND VISION FOR THE NEXT 5-10 YEARS

"To continue to provide excellent customer service while we grow our technical capabilities to meet the needs of our expanding customer base and focus on technology based companies for future growth."
